The way they get trained we do not find any difficulty to fit them into industrial environment.”

George Telegraph students are technically well-groomed and have in-depth knowledge which we do not get in other institutes.”

When we first started looking for hiring people for our organization we contacted several places and found George’s students are the best. They are more knowledgeable and focused. Right now we have 16 technical professionals working in our service station out of which 13 are from GTTI. We wish GTTI more success in grooming candidates like this.
